

Using Eclipse: deploying your application from the eclipse IDE

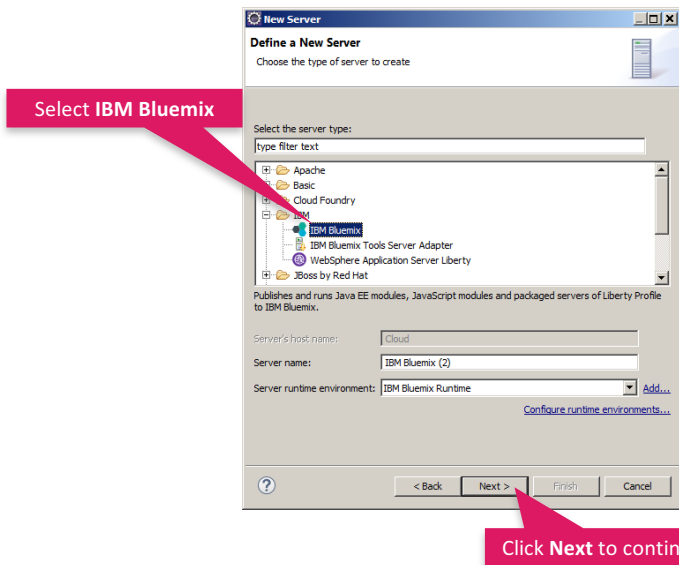

IBM Eclipse Tools for Bluemix

- Available in the Eclipse marketplace as a plug-in
- Enables developers to develop in Eclipse and then deploy to Bluemix Cloud Foundry applications
 - Java Liberty and Node.js apps are supported

Creating an IBM Bluemix server connection in Eclipse

- In Eclipse preferences, click **File > New > Other**. Then, click **Server and Next**.
- Click **IBM Bluemix** and proceed through the setup wizard.

Working with multiple Bluemix regions in Eclipse

- Select the URL pulldown in the **IBM Bluemix Account** dialog.
- Select the desired region.
